

FACILITIES MAN — Placeholders Checklist

Purpose: Single checklist of owner-supplied content still marked `[PLACEHOLDER ...]` (or trust shells) across the webapp.

Generated: 2026-09-17

Scope: Source under `src/` (UI copy and FAQs). Does not include dashed `ImagePlaceholder` fallbacks when a `src` is missing.

Tick each item when the real value is confirmed and the placeholder string is removed from code.

Priority A — Business / compliance (blocks “production-ready trust”)

Done	Placeholder	Where	Notes
☐	Public liability insurance amount (e.g. \$20M)	<code>src/components/layout/Footer.tsx</code>	Footer trust line
☐	Public liability insurance amount	<code>src/components/home/HomePage.tsx</code>	Trust band
☐	Public liability insurance amount	<code>src/data/home.ts</code>	Homepage FAQ / trust copy
☐	Public liability insurance amount	<code>src/components/certifications/CertificationsPage.tsx</code>	Body + FAQ (multiple)
☐	Professional indemnity — confirm if held	<code>src/components/certifications/CertificationsPage.tsx</code>	Body + FAQ
☐	Insurance certificate issue / renewal date	<code>src/components/certifications/CertificationsPage.tsx</code>	FAQ
☐	Insurance certificate PDF link	<code>src/components/certifications/CertificationsPage.tsx</code>	“Certifications we hold” list
☐	ISO 9001 target date	<code>src/components/certifications/CertificationsPage.tsx</code>	Roadmap
☐	ISO 14001 target date	<code>src/components/certifications/CertificationsPage.tsx</code>	Roadmap
☐	ISO 45001 target date	<code>src/components/certifications/CertificationsPage.tsx</code>	Roadmap

Priority B — Founder / brand identity

Done	Placeholder	Where	Notes
☐	Founder name + headshot	<code>src/components/home/HomePage.tsx</code>	About teaser on home

[]	Founder name (if still generic “Our founder”)	src/components/about/AboutPage.tsx	Confirm named bio
-----	---	------------------------------------	-------------------

Priority C — Reviews / Google Business Profile

Done	Placeholder	Where	Notes
[]	First Google review stars + text	src/components/home/HomePage.tsx	Trust strip / band
[]	Google Business Profile review URL	src/components/reviews/ReviewsPage.tsx	GBP_REVIEW_URL constant
[]	Google Reviews embed / widget	src/components/reviews/ReviewsPage.tsx	Shell empty state
[]	Home “Reviews & Recognition” trust block	src/components/home/HomePage.tsx	Replace trust placeholder section
[]	First industry certification badge (graphic + name)	src/components/home/HomePage.tsx	Trust band

Priority D — Forms / UX copy leftovers

Done	Placeholder	Where	Notes
[x]	CTA note: “full quote form submits on Contact page”	src/components/ui/CtaSection.tsx	Done 2026-09-17 — real Contact-page copy + “Go to the full quote form” CTA

Priority E — Case studies / earned content shells

Merged 2026-09-17 from Downloads Priority D & E package (patch + case-study-readiness.ts).

Example Scope Profiles + filters + metro Local Case Reference blocks are live in code. **No new URL routes** were added (still **57** pages).

Done	Item	Where	Notes
[]	First earned / published case study	src/components/case-studies/CaseStudiesPage.tsx	Still pending real client-approved outcomes. 13 Example Scope Profiles shipped as transparent non-case-study content (src/data/case-study-readiness.ts)
[x]	Case study filters with items	same + case-study-readiness.ts	Done — service / industry / location filters over 13 example scopes
[x]	Local case reference blocks	Sydney / Brisbane / Melbourne + LocationPageTemplate	Done — master-doc H2 “Local Case Reference” with transparency wording

	on metro location pages		
--	-------------------------	--	--

Already filled (no action)

Item	Status
Business name, ABN, phone, email, trading hours	Set in <code>src/lib/site.ts</code>
GA4 measurement ID	<code>SITE.ga4Id</code>
Brand colours / logo	In CSS + <code>public/images/brand/</code>
Hosting (Vercel) / Next.js stack	Live project <code>f-mwebapp</code>
XML sitemap	<code>public/sitemap.xml</code> via <code>next-sitemap</code>
HTML sitemap	<code>/sitemap/</code> page added

How to clear a placeholder

1. Confirm the real value with the business owner.
2. Search the repo for the exact `[PLACEHOLDER — ...]` string.
3. Replace in every listed file (amounts often appear in **multiple** places).
4. Re-check this checklist and tick the row.
5. For reviews / AggregateRating schema: **do not** add `AggregateRating` JSON-LD until verified Google reviews exist (see master doc + `ReviewsPage`).

Quick search

```
rg "PLACEHOLDER|TRUST PLACEHOLDER" src --glob "*.ts,tsx,mdx"
```
